3, Installing the Wireless Driver:

Double-click on the file installation .pkg file

4, Starting the Ralink Wireless Installer:

Following the steps and continue

- 5, Selecting the Destination and Install
- 6, Finishing the installation and Restarting computer
- 7, Find the Wireless Utility under the Applications folder

8, Plugging in your Wireless USB adapter:

Disable Airport or other wireless adapter before you can use Ralink Utility

9, Once Wireless Utility opened, you can RESCAN and select the network you want to connect.
