

i-Smith (Virtual Disk)

User Manual

- Best Privacy Tool For Your Files-

Requirement: Give-Me-Five USB WiFi Adapter Card

i-Smith System (Private File Protection):

=> The i-Smith System is unique software used to raise the network security of private data and information for each personal computer using the GM5 WiFi USB Adapter. With the i-Smith System, you will be able to lock and conceal all personal files to protect your private information, making data theft a thing of the past.

Features:

- a. Ability to hide files and folders.
- b. Supported on GM5 USB WiFi Adapter Cards Only.
- c. Convenient install / uninstall process.
- d. Password protection.
- e. Multiple virtual disks set up.

1. Installation

1-1 Connect your GM5 WiFi USB Adapter Card to your computer and insert the install disk into your CD/DVD drive.

	Velcome to install /irtual Disk Version 2.0.0.306

	ОК	Cancel

2. Application

A maximum of four virtual disks can be created using the **i-SmithSystem**. Those virtual disks are protected by a personal password and the GM5 network card. The virtual disks will disappear when a customer closes the **i-SmithSystem** and reboots the computer. There is no way to find the virtual disks you set up without the **GM5** card. Therefore, the **GM5** card is the key to open up your personal private folders and files. The **i-SmithSystem** strengthens the security of all private information.

"ADD" function

1-1 Double click the Virtual Disk icon to bring the I-Smith's menu to the foreground.

- c. Storage drive: Storage location for the virtual disks.
- d. Free space: Amount of unused hard drive space available.
- e. Image name: The image name of virtual disk for saving backup copy.

f.Restore: Revert all settings back to the backup copy you saved from e step.

Note: You can only have a maximum of four virtual disks.

Attention:

- 1. The i-Smith System will not load without the GM5 network card.
- 2. As the i-Smith System was opened, it is fine to pull out the GM5 network card.

Conclusion:

The **i-Smith System** keeps your data protected quickly by easily hiding files/folders from anyone who uses your computer. The **GM5** and **i-Smith System** must be utilized together in order to protect your data. As a result, it certainly augments network privacy and safe guards against attacks by hackers. In short, the **i-Smith System** resolves the security issue with the **GM5**.
